

2007/8 Sustainable Development Fund Projects Update 31/3/2008

	Project title and applicant	Description of project	Grant offer amount	Amount claimed	Conclusion of Project.
1	North Norfolk Live Shellfish Handling Facility. Wells Harbour Commissioners.	Communal shellfish handling facility to be built at the east end of Wells harbour quay. Will encourage fishing organisations to work together, improve survival rate for crabs landed and separate fish working area from tourists.	£25, 000 31% of total cost of work we are funding (about 6% of total project)	0	Despite every effort by all involved to get this project started and completed with in the 2007/8 year the project has failed to get off the ground. Therefore the £25,000 granted has not been able to be allocated.
2	Sedgeford Primary School Vegetable and Fruit Garden. Sedgeford Primary School	Fruit and veggie garden in school grounds with children growing and harvesting food for use in their school lunches. Wildflower area and bird boxes installed.	£917 50%	£693	This project is up and running very successfully with a seasons produce harvested and a very enthusiastic gardening club established. They have brought a tool shed (£100) rather than as many sleepers as they have had wood donated.
3	Development of a Natural Environment Toolkit. Norfolk Rural Community Council	Development of a computer based environmental toolkit to be used by local communities (and potentially further a field as well) in putting together parish plans, community plans etc.	£9,000 75%	£9,000	UEA have completed the work and we will soon be publicising the website address. There is potential for more work on its presentation during 2008.
4	07812 Coastal Futures II NCC, Nell Seal	Extent programme offered last year to more schools. Build on last year's programme by offering greater follow up activities and support back in school. Free training to 12 teachers from 12 schools to show how the AONB can be used to raise achievement and aspirations.	£5888.7 49.9%	£5581. 96	Project has progressed well and was granted an extra £232.6 to fund website work. However now under claiming slightly due to a staffing shortage issue leading to some of the follow up surgeries not taking place.
5	Blakeney Lower Quay. Red House Land Trust	The replacement of the old timber quay on the Blakeney waterfront, most of which is currently unusable due to its dilapidated state. It will include disabled and be in a style in keeping with the history of the area.	£3667 13%	£3667	Project successfully completed and now waiting for better weather to sow the grass behind the new quay.
6	Sustainability of Crab Catching Through Education Cambridge University (Zoology Department)	University students, having carried out research in the previous year want to make their findings meaningful. They will produce A5 flyers to be distributed for free through local shops in Wells with crabbing equipment. They are aimed at educating children about the crabs and how to make sure they survive being captured and released.	£172 74%	£172	Project has been successfully completed and pamphlets are ready to be distributed to shops. The actual value of the full project is several thousand pounds when all the work that the students have put in is factored into it.
7	Community wardrobe Sheringham-Plus	Continue work on setting up a costume hire business as a social enterprise. Employ a student force person to help set up the business, review business plan, conduct market research, and deliver community training.	£7,000 Up to 75%	£3172.82	Due to staffing difficulties this project came in under budget. However most of the outcomes have been achieved through a combination of the person in post and the efforts of volunteers.

8	Griffon Walks The Griffon Area Partnership	3 walks leaflets produced (as part of a series of 3 walk packages). All circular walks are in the Mundesley and Southrepps area and follow quiet lanes and footpaths. Also down loadable. Text aimed at helping people feel more confident to get out and walk, therefore increasing activity, and enjoyment understanding and appreciation of area.	£3,030 75%	£3030	All three brochures completed to a high standard.
9	Roots and Shoots: Growing for the Future! Holt Hall Field Studies Centre	To employ a teacher for two terms to set up and run an education programme focusing on growing/farming/rural studies. The project aims to be holistic in terms of health, wellbeing and sustainability and follows the recommendation of a DEFRA funded scoping study. To do work to bring the Victorian kitchen garden at Holt Hall back into production - organic	£10,871 42% Now £12,071 at 43%	£12,071	Project going very well. Schools currently involved: Sheringham High, Woodfields, Sidestrand, Taverham High, Stalham High. Also Holt Youth Project. Great interest from a range of organisations in seeing this project developed further. £1200 extra funds allocated to project to purchase further equipment. Match funding is in place for this at 50%
10	07822 North Norfolk Coast Birds and Recreation Study	A scoping study to summarise evidence on the sensitivity of coastal bird species to recreational disturbance.	£500 50%	£500	Project successfully completed.
